Gaming

Tech

## PROFILE

Software Engineer från Skövde, specializes in modern web technologies. Upper Secondary School Engineer from NTI Gymnasiet with practical experience in full-stack development. Two-time winner of the NTI Game On competition. Uses ESLint, Prettier and TypeScript to maintain a high code standard.

## PROJECT

### [Class Collapse](#)

March 2024 – Current

A VS Code extension that has 800+ downloads. (Open VSX + VS Code)

### CV Maker

January 2024 – Current

A website that allows people to create their CVs; for example, this CV is made on this website

### [Portfolio v3](#)

December 2023 – Current

I'm currently rewriting my portfolio for the third time

## EDUCATION

### CS50x, Harvard University, Remote

March 2024 – April 2024

"An introduction to the intellectual enterprises of computer science and the art of programming." - Harvard University

What we learned was: HTML, CSS, Bootstrap, JavaScript, Python, Flask, Jinja and C

### Upper Secondary School Engineer, NTI Gymnasiet, Skövde

August 2022 – June 2023

The TE4 program focuses on project-based learning, where I took on the role of a full-stack developer in most group projects. During this program, you got to learn JavaScript, React, MySQL, PHP, Kotlin, and Git. I also had 10 weeks of workplace-based learning at Farsight.

### Technology Program, NTI Gymnasiet, Skövde

August 2019 – June 2022

In the technology program with a focus on information and media technology, I learned HTML, CSS, JavaScript, PHP, MySQL, Python, Java, and Git. I also took courses in pixel design and web design, where we learned Photoshop and Illustrator, but I used Figma instead of Illustrator, which is now part of NTI's curriculum. I also won the "Game On" competition organized by NTI.

## INTERNSHIP

### Fullstack Developer, Farsight, Skövde

February 2023 – May 2023

At Farsight, I worked on their time and task website, updating interfaces, adding new features, and improving database performance. The biggest challenge was not the 20-year-old codebase, but the lack of documentation. Technologies used included HTML, CSS, Bootstrap, JavaScript, jQuery, CKEditor, PHP, CodeIgniter, MariaDB, and TortoiseSVN.

**IT Technician, HCL Technologies, Skövde**

October 2018 – October 2018

During my internship at HCL Technologies in Skövde, I managed IT application operations for Volvo Group Trucks Operations and handled documentation in Excel, PowerPoint, and Word. I also participated in planning application installations in Ghent, Belgium.
